

# C-DOT Cable STB (CB100) / Cable Hybrid STB (CB100 Plus)

This Cable STB (CB100) and the Hybrid version (CB100 Plus) is a Customer Premise Equipment, which has been designed to receive RF signals over coaxial cable (DVB-C) and decode the same into Video and Audio signals playable on TV through HDMI or AV Interfaces. These can be configured/customized for the cable operator's network. The connected path can be utilized for various value added services such as user interactions with operator, local content distribution, etc.

## **Product Features**

- RF Input: Fully compliant to DVB-C
- Audio/Video: Stereo, High Definition, MPEG2/MPEG4
- Smart card: ISO7816-3 compliant (Supports Card less CAS also)
- Communication Interfaces: USB 2.0 HS, IR Remote, and Network Interfaces
- IP connectivity for Hybrid model
- Software upgrade via USB or Over the Cable
- PVR support using USB
- Low Power Consumption : 8 Watts (approx.)
- Input Power: 12V DC @1.5A Max
