

C-DOT DTH STB (DT100)

DTH Hybrid STB (DT100 Plus)

This DTH STB (DT100) and the Hybrid version (DT100 Plus) is a Customer Premise Equipment which has been designed to receive the Satellite (DVB-S/S2) RF signals and decode the same into Video and Audio signals playable on TV through HDMI or AV Interfaces. This can be used for reception of Doordarshan content as well as PayTV content of private DTH operators. This also has advanced features and attributes to offer additional facilities to the end users. The connected path can be utilized for various value added services such as user interactions with operator, local content distribution, etc.

Product Features

- RF Input: Fully compliant to DVB- S/S2
- Audio/Video: Stereo L&R (RCA Type), CVBS (RCA Type), HDMI1.4a, S/PDIF
- Supports Card less CAS
- Communication Interfaces: USB 2.0HS, IR Remote, and Network Interfaces
- 5-Keypad on front panel for PWR, CH+/- and VOL+/-
- IP connectivity for Hybrid model
- Software upgrade via USB or OTA
- PVR support using USB
- Low Power Consumption : 8 Watts(approx.)
- Input Power: 12V DC @1.5A Max
